Our dedicated team of experts offer a fast response anywhere in the UK and with our friendly claim handlers we provide support emotionally, technically and practically to our customers, helping to get them back on their feet again.

- Working on behalf of many of the UK's top insurance companies on their policy holders property claims
- 27 branches strategically located across the UK
- 2 hour emergency call out
- Contents restoration facilities in 12 centres across the UK - 95% restoration success rate

CONTENTS RESTORATION

The iCare Validation and Inventory app and DC 4000 soft contents processing system has restored 95% of soft contents since its launch in 2017. To date restoration had provided a saving of c70% of replacement value, delivering major cost benefits to insurers.

Photographs above show the DC 4000 wash system and below some items before, then after restoration.

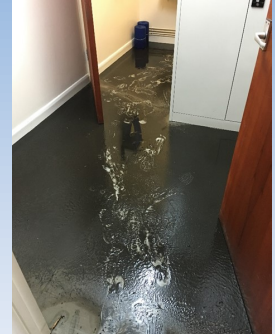

FIRE DAMAGE

We have the resources, skills and expertise to restore any property following smoke or fire damage from any source.

WATER DAMAGE

We specialise in all types of restoration to properties following water damage, from floods or escape of water from fixed installations.

LEAK DETECTION

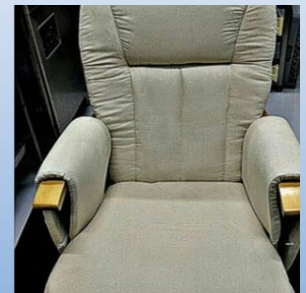

Avoid major excavation, cost and disruption with our Leak Detection service utilising Thermal Imaging technology. Pinpoints the exact location of hidden leaks.

MOULD REMEDIATION

Mould can cause severe health issues. We identify the cause of mould contamination, and treat the cause and effect of the mould.
